Graduate Diploma of Surgical Anatomy

✔ The Graduate Diploma of Surgical Anatomy provides clinically relevant advanced anatomy training for medical graduates registered with the Australian Health Practitioner Regulation Agency (AHPRA). The course is suited to those located outside of metropolitan centres in Australia who want to advance their career.

✔ Learn the advanced structure of the human body by regions through a combination of core anatomy teaching, specialist surgical teaching and full human body cadaveric dissection workshops.

✔ This one year full-time (or equivalent part-time) course is suited for busy professionals with the flexible delivery mode of online classes and four block intensives on campus.

COURSE DETAILS:

Locations:	Online. This course requires some on-campus attendance (2 x 4 days in Townsville).
Commencing:	July
Duration:	1 year full-time Part-time available
Prerequisites:	AQF level 7 bachelor degree in a health-related field, be AHPRA registered and maintain registration for the duration of the course; or be a current final-year student of a JCU M6 (u)-4.2 (d)-7 (e)-11.

Cadaveric dissection workshops

The specialised professional, academic and technical requirements necessary for the delivery of the cadaveric dissection workshops requires this part of your studies to be delivered at the JCU Townsville, Douglas campus.

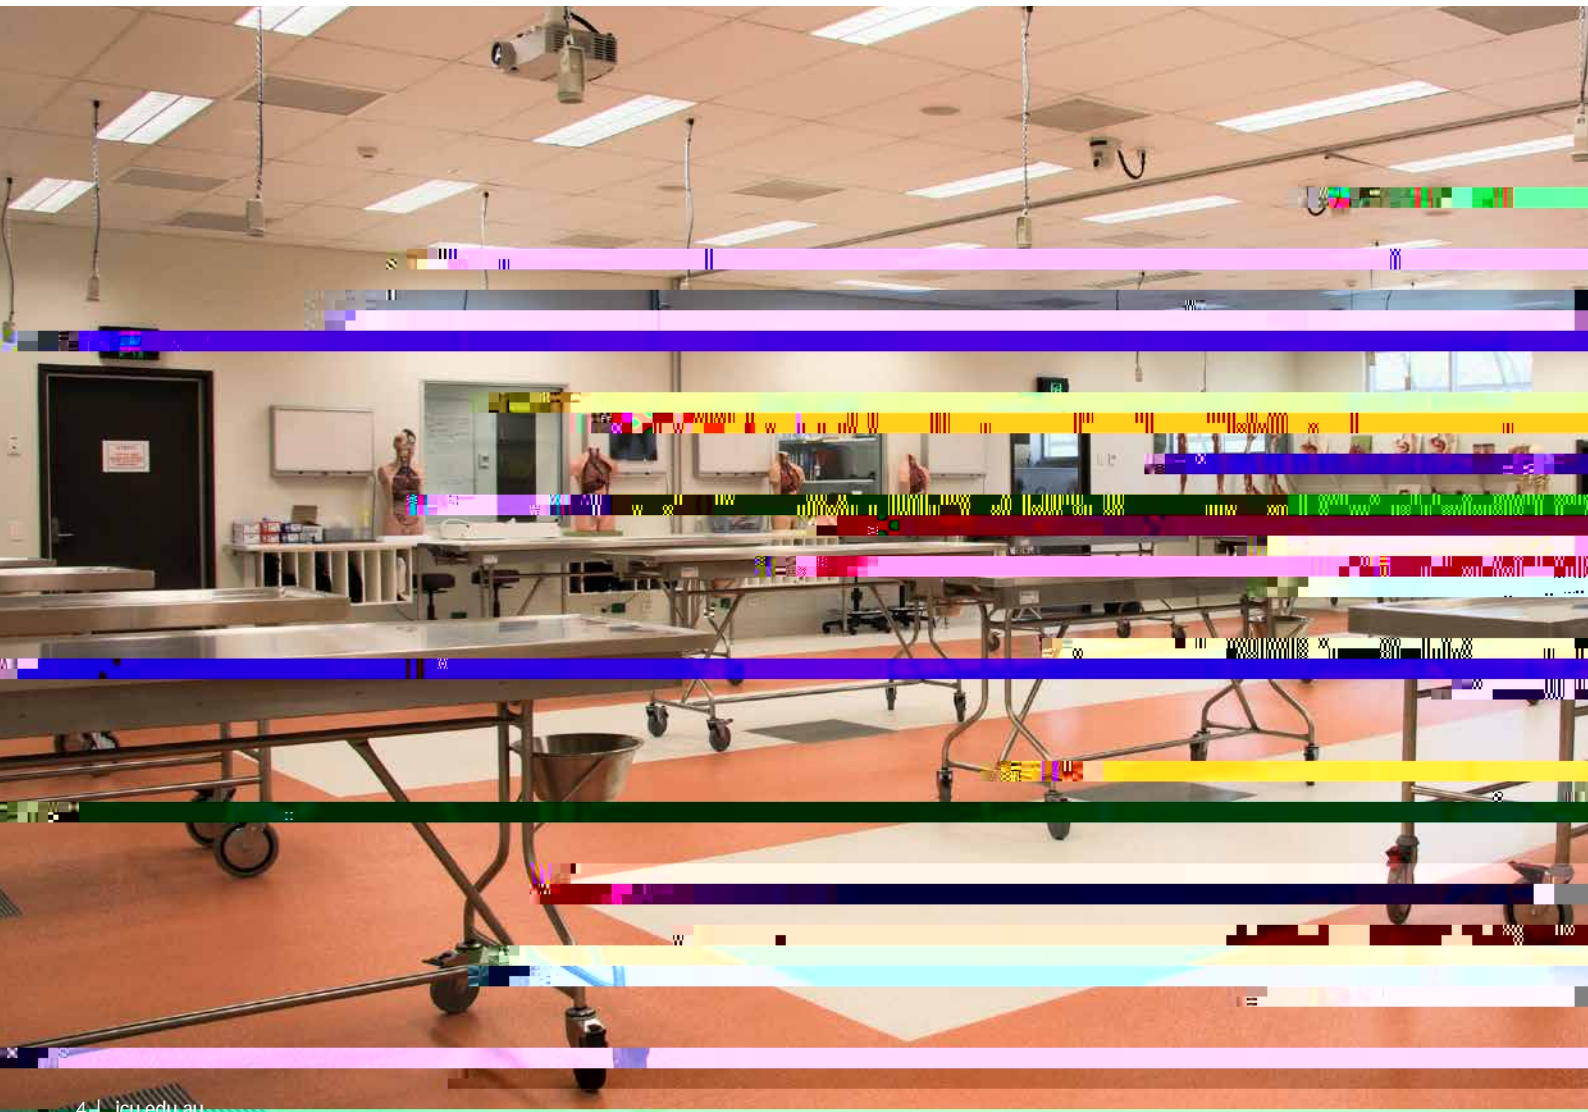

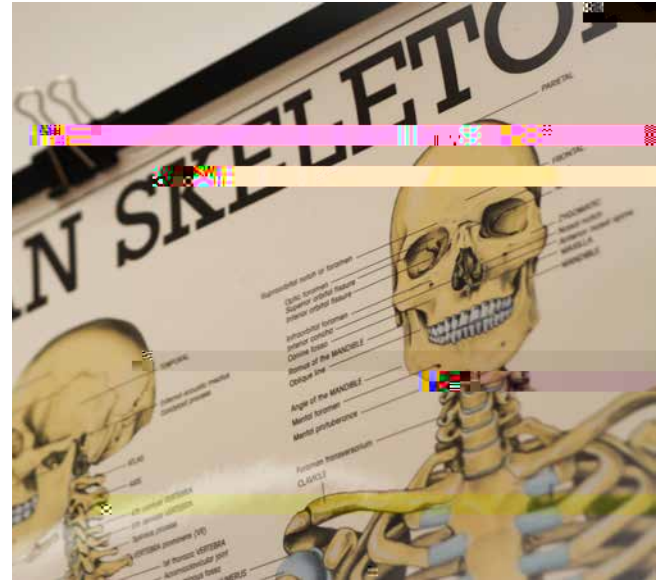

2024:

Workshop 1

24 - 27 September 2024 - Thorax and Abdomen

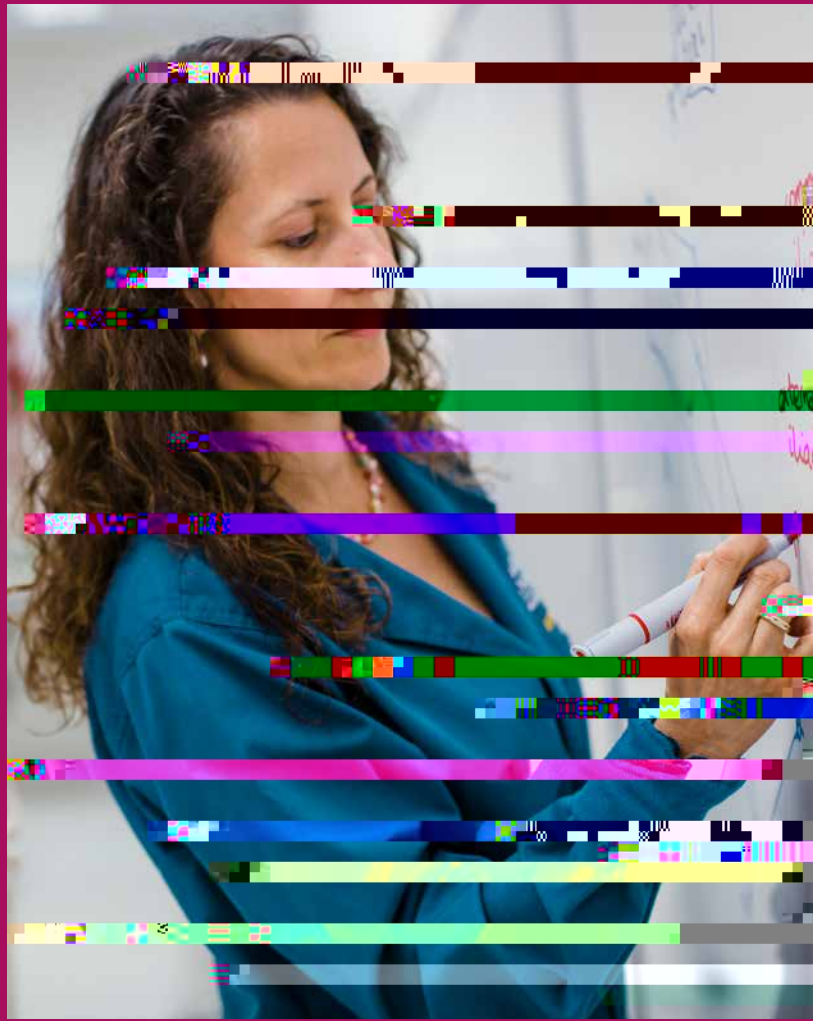

Workshop 2

3 to 6 December 2024 - Pelvis and Lower Limb

“JCU’s Graduate Diploma of Surgical Anatomy is outstanding. The course is very useful and appropriate for where we’re up to. It’s delivered at a level above medical school. It gives us what is expected of someone who is going to operate and needing to be aware of what might cause problems, and how to avoid that. The dissection element of the course translates particularly well to real-world operating. You get international experts, retired surgeons with more than 50 years’ experience and anatomists. Getting those perspectives on anatomy, approaches and clinical relevance is extremely useful. I’ve also found everyone to be very approachable.”

Dr B D
GRADUATE DIPOLMA OF SURGICAL ANATOMY STUDENT

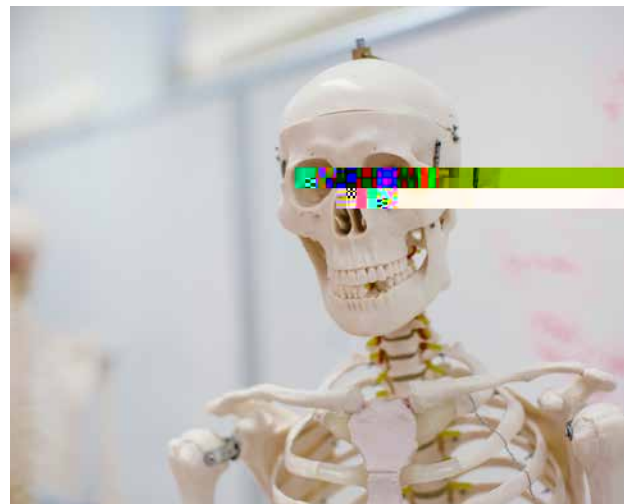

“The Graduate Diploma at JCU is delivered through online delivery and limited mode attendance and includes a detailed dissection of a whole human cadaver over the course of a year.”

Career Opportunities

This course is suited to doctors who are working towards a surgical career. Other doctors (particularly those working in rural, regional and remote communities) may find this course useful as it will expand their scope of practice through developing a deeper understanding of human anatomy.

How to apply

Complete an online application through our [Online Application Portal](#). Your application must reach us before the application deadline for your course.

ENTRY REQUIREMENTS

All applicants must provide evidence of being immune to Hepatitis B within the first teaching period of their studies. Evidence of having a blood-borne viral disease may result in a student's inability to obtain a placement in a Queensland Health facility and consequently, may result in your inability to complete the requirements of the course as accredited by the relevant professional accrediting body.
